

KRITIKA GUPTA

SENIOR BUSINESS ANALYST | DELIVERY & DIGITAL TRANSFORMATION | DATA & ANALYTICS GOVERNANCE

United Arab Emirates | +971 54 443 2765 | kritikag2603@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL PROFILE

Senior Business Analyst with 7+ years delivering complex programmes across three distinct environments: a regulated US government healthcare platform, FMCG/retail asset governance, and enterprise digital transformation in the UAE. Converts ambiguous business needs into governed requirements, structured delivery and measurable operational impact, using discovery, Agile/SDLC, UAT and stakeholder alignment as the common thread across every domain.

Brings structure to ambiguity, connects business priorities to execution, and uses AI-assisted research, documentation and prototyping to accelerate delivery while retaining human judgement and quality control.

CORE CAPABILITIES

Business Analysis: Discovery workshops, requirements elicitation, BRD and FRD development, process mapping, business rules, user stories, acceptance criteria, solution design, traceability and documentation.

Delivery and Governance: Project planning, scope, backlog and sprint planning, RACI, RAID, capacity and dependency management, change control, status reporting, decision logs and closure.

Stakeholder and Vendor Leadership: Executive communication, client management, cross-functional coordination, vendor and freelancer management, negotiation, training, adoption and escalation management.

Quality, Transformation and Applied AI: Agile, SDLC, UAT, functional testing, data validation, RCA and CAPA, workflow digitisation, process improvement, operational controls, and applied AI for research, requirements documentation, prototyping and validation.

Tools and Systems: Power BI (DAX, Power Query), SQL Server, Python, AWS S3, MS Excel (advanced), MS Office suite.

PROFESSIONAL EXPERIENCE

Lead Associate – Technology

May 2024 – Present

ManSci Professional Services DMCC | UAE

- **Owned end-to-end BA and delivery** for a multi-workstream digital transformation programme, leading discovery workshops and stakeholder interviews across client, vendor and internal technical teams to define scope, priorities and outcomes, and translating findings into BRDs, FRDs, process maps, user stories, acceptance criteria, prototypes, RACI and RAID as a single execution baseline for developers, DBAs, vendors and client stakeholders.
- **Re-engineered 100+ monthly development requests across 35 clients** into a governed SDLC intake and delivery model (BRD-led prioritisation, capacity planning, seven-day sprints, UAT, closure controls), reclaiming approximately 4 hours per week and improving leadership visibility.
- **Established incident governance** with severity, ownership, SLAs, escalation, root-cause analysis and corrective/preventive actions, reducing recurring issue-management effort by approximately 6 hours per week.
- **Digitised 15–20 monthly payment requests** through controlled approval workflows from requester to HoD to MD, improving traceability, budget visibility and audit readiness while saving approximately 2 hours per week.
- **Implemented an attendance and availability process** for 13 users, improving workload visibility and resource planning through training, governance and performance reviews.
- **Strengthened data-quality and exception-reporting controls**, eliminating approximately 5,000 false events per day and restoring confidence in management information.
- **Automated management reporting and established a Voice-of-Customer process** converting approved feedback into prioritised delivery items, saving approximately 4 hours per week, using AI-assisted research, prototyping, documentation and validation while retaining human review.

Business Analyst

Jun 2023 – May 2024

Blue LLC (Alserkal Group) | UAE

- **Designed and delivered an asset lifecycle solution** for 120+ assets, governing purchase, ownership, assignment, transfer, maintenance, depreciation, disposal and approvals to strengthen control and accountability.
- **Led Finance, IT, Sales and Operations workshops**, mapped as-is and to-be processes, clarified business rules and defined KPIs, translating operational needs into implementable requirements.
- **Consolidated fragmented reporting across six departments** into a shared management information model, improving consistency of asset cost, ageing, allocation, revenue, sustainability and operations reporting.

- **Structured industrial and environmental service activities** into workflows, controls and reporting requirements that supported operational visibility and management decision-making.

Analyst

Jan 2021 – Jan 2023

Deloitte USI | India

- **Supported CalHEERS**, a California state government healthcare insurance platform, across Agile release planning, requirements interpretation, functional testing, defect triage, QA and UAT, strengthening delivery quality in a regulated environment.
- **Led a four-member team**, coordinating work allocation, progress tracking, issue resolution and quality across delivery cycles.
- **Improved QA coverage by 12–15%** through validation automation, increasing test efficiency and release confidence.

Programmer Analyst

Nov 2018 – Jan 2021

Cognizant Technology Solutions | India

- **Reduced reporting and validation turnaround by 30%** by redesigning manual data-processing activities into automated validation workflows.
- **Worked with business analysts, developers and QA** to translate BRD-aligned requirements into testable automation, support defect resolution and drive continuous improvement.

EDUCATION

Bachelor of Technology, Electronics and Communication Engineering | Rajasthan Technical University, India | 2018

AWARDS

- Received two Deloitte Spot Awards recognising contribution to the CalHEERS engagement and leadership of a four-member team.
